## CHOLIDIN®

MVP Labs.

**Active Ingredient(s):** CHOLIDIN® contains: Phosphatidylcholine (from soy lecithin), choline (as chloride), dl-methionine, inositol, zinc (as oxide), niacinamide, vitamin E, thiamine (mononitrate), riboflavin, pyridoxine (HCl), selenium (sodium selenite), vitamin B<sub>12</sub> (cobalamin concentrate), and dexpanthenol. Formulated with a flavor base.

**Indications:** A dietary supplement to increase levels of available choline and phosphatidylcholine through dietary loading.

**Dosage and Administration:** Usual Daily Dose:

Animal	Tablet Form	Powder Form
Cats and Small Dogs	1/2-1 tablet	1/4-1/2 teaspoonful
Large Dogs	1-2 tablets	1/2-1 teaspoonful

The tablets may be fed by hand or crumbled and mixed with food.

The powder may be mixed with food.

**Caution(s):** Keep out of the reach of children.

**Side Effects:** Infrequently, animals on a choline loading regime will show signs of increased neurological activity such as hyperactivity, social agitation, muscular twitching, etc. If these signs are seen, cessation of tablet or powder administration will quickly result in the disappearance of these signs. After a period of three or four days, the animal may be started again on the same dosage, usually with no adverse reaction.

**Presentation:** Tablets: 50, 180 and 500-count bottles.  
Powder: 1 lb. containers.

**NAC No.: 11120011**
