▲ Reported on a hydrous basis.

▼ Standardized to contain a minimum of 30% of avocado/soybean unsaponifiables.

This bottle contains (1) non-toxic desiccant to help preserve freshness and ensure the shelf life of the product.

Administration As A Supplement For Dogs

Dog's Weight	Number of tablets Per Day	
	Initial 4-6 Week Administration Period	Suggested Maintenance Level
Under 10 lbs.	1/2	1/2
10-29 lbs.	1	1/2
30-59 lbs.	2	1

Allow 4-6 weeks initially to note a response, though some dogs may respond sooner. If desired, the number of tablets may then be reduced to a maintenance level. Once consistent improvement is noted at the maintenance level, administration may be further reduced to every other day. The maintenance level can also be used long-term on healthy dogs to help support their joints. An individual dog's needs may vary. Dogs on a maintenance level can be increased to the initial level as needed, e.g., on weekends or other times when they are more active, to provide extra support to the joints.

Dasuquin[®] is also available in tasty soft chews.

Store in a cool, dry area out of direct sunlight. Keep lid tightly secured to ensure freshness. Keep bottle out of the reach of children.

◆Source: Among veterinary brands. Survey conducted in November 2009 of small animal veterinarians who recommended oral joint health supplements.
