DASUQUIN® SOFT CHEWS FOR LARGE DOGS

Nutramax Labs.

Dasuquin is the exclusive veterinary formulation that contains the potent combination of glucosamine hydrochloride, low molecular weight chondroitin sulfate, and avocado/soybean unsaponifiables (ASU). Dasuquin is formulated to deliver maximal cartilage support.

Administration as a supplement for dogs

Dog's Weight	Number of soft chews/day	
	Initial 4-6 week administration period	Suggested maintenance level
60-120 lbs.	2	1

The recommended initial administration period is 4-6 weeks; however, some dogs may respond in a shorter period of time. If desired, the number of Dasuquin soft chews may then be reduced to a maintenance level. The maintenance level can also be used long-term on healthy dogs to help support their joints.
