PYOBEN® SHAMPOO

Virbac

DERMATOLOGY

MEDICATED SHAMPOO

ANTIMICROBIAL FOR DOGS AND CATS

ANTIMICROBIAL

KERATOLYTIC

FOLLICULAR FLUSHING

PYOBEN Shampoo is an antimicrobial, keratolytic and follicular flushing shampoo specifically formulated for the topical treatment of deep cutaneous infection in dogs and cats. PYOBEN, using SPHERULITES and chitosanide, represents a breakthrough in skin care technology.

SPHERULITES: an exclusive and patented encapsulation system developed by Allerderm, provides slow release of ingredients long after the shampoo is rinsed off.

Chitosanide: a natural biopolymer creates a protective film on the skin and hair. This technology reinforces the hydrating and restoring properties of the formulation, helping to protect the skin against damage from the environment.

USES

PYOBEN Shampoo is an antimicrobial, keratolytic and follicular flushing shampoo for use on dogs and cats of any age.

CONTAINS

Benzoyl peroxide 3% in a shampoo base containing water, sodium C14-C16 olefin sulfonate, Spherulites, glycerin, citric acid, carbomer 940 and chitosanide. Chitosanide and glycerin are present in encapsulated (Spherulites) and free forms. Urea is present in encapsulated form.

DIRECTIONS

Shake well before use. Wet the coat with warm water and apply sufficient shampoo to create a rich lather. Massage PYOBEN into wet coat, lather freely. Rinse and repeat. Allow to remain on hair for 5 to 10 minutes, then rinse thoroughly with clean water.

Frequency of use: initially two to three times a week for four weeks, then reducing to once a week, or as directed by your veterinarian.

WARNING

Keep out of reach of children.

CAUTION

Federal Law (USA) restricts this drug to use by or on the order of a licensed veterinarian. For external use only on dogs and cats. Avoid contact with eyes or mucous membranes. If condition persists or does not improve in 7 days, consult your veterinarian. Wash hands and exposed skin after using. May bleach colored fabric.

AVAILABLE THROUGH LICENSED VETERINARIANS ONLY.
