

## **Vetericyn VF Ophthalmic Wash**

### **Veterinary Formula**

### **Cleans • Treats • Heals**

**Vetericyn VF Veterinary Formula Ophthalmic Wash** is a one-step topical solution that cleans wounds, treats infection and kills bacterial, viral and fungal pathogens, including antibiotic resistant MRSA. Used to treat irritated eyes and provides relief from burning, stinging, itching, pollutants and other foreign materials. The safe pH neutral formula is steroid-free, antibiotic-free, non-toxic, non-sensitizing and non-irritating. 100% biocompatible.

### **Vetericyn VF Ophthalmic Wash Kills Bacteria in 30 Seconds!**

Vetericyn VF is as safe as saline, because it is based on a oxychlorine compound similar to that produced by the animal's own immune system. Having the same pH as normal tear fluid, it will not sting when applied. Vetericyn Veterinary Formula has twice the strength as regular Vetericyn (OTC).

### ***Vetericyn VF Ophthalmic Wash Formula based on FDA-Cleared Microcyn Technology.***

- Safe to use in and around the eye
- Kills bacteria, viruses or fungi
- Non-toxic and non-stinging
- Reduces inflammation and itching

**Directions:** Administer topically to the animal's eye 3-4 times daily, or per treatment protocol as directed by the veterinarian.

The cone shaped applicator makes it easy to apply directly to the eye. Superior to petroleum-based ointments because it will NOT stain, and is non-greasy. Vetericyn is safe if licked or ingested by the animal and is 100% biocompatible and non-toxic.

**Ingredients:** Electrolyzed Water [99.837%], Sodium Phosphate [0.13%], Sodium Chloride [0.024%], Hypochlorous Acid [0.008%], and Sodium Hypochlorite [0.009%]

**Package Size:** 2 fl.oz. [60ml]

For use in animal eye only.

**Storage:** Store with cap tightly closed at room temperature. Do not freeze.
